22.47%

Attrition rate at
TechIT Solutions

Business brief adapted from the HR Attrition Analytics project by Ankit Raj Mishra.
Analysis and findings are my own.

CONTEXT

Background

TechIT Solutions is a service-based firm that delivers IT and business support to clients in finance, healthcare and retail. Rising employee turnover has started to hurt project delivery and team stability.

~10,000	22.47%	3
Employees	Attrition rate	Client industries

CHALLENGE

Problem Statement

Despite its size, the company has no clear view of why attrition keeps rising. Leadership needs answers to three questions.

01

Who is leaving?

Which departments and job roles are most affected by attrition.

02

Why are they leaving?

Which factors are driving employees to resign.

03

Do policies play a role?

How company policies such as business travel and overtime influence turnover.

IMPACT

Why It Needs to Be Solved

Before: the current state

- Loss of talent and knowledge
- Higher hiring and training costs
- Disrupted project delivery
- Generic, untargeted HR initiatives

After: the target state

- Root causes visible by role, department and location
- Targeted retention: promotions, role changes, benefits
- Leaders decide with dashboards, not assumptions
- Higher satisfaction and longer tenure

PEOPLE

Stakeholders

The teams below use attrition insights to improve their work and company performance.

HR Department

Improve retention and employee satisfaction.

Dept. Heads & Team Leads

Prevent overwork and strengthen team management.

Business Leaders

Set strategy from attrition trends and business impact.

Recruitment Team

Plan hiring for roles with frequent exits.

Payroll / Finance

Track effect on salary budgets, hiring costs and retention savings.

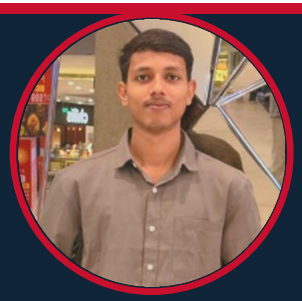

SCOPE

Business Questions

1. What is the overall attrition rate?
2. Which departments face the highest attrition, and why?
3. How does job role influence attrition?
4. Is distance from home correlated with attrition?
5. Is overtime contributing to higher attrition?
6. How do job and environment satisfaction affect retention?
7. Do employees with low work-life balance quit more often?
8. Are frequent business travellers more likely to leave?
9. Does time in the same role correlate with leaving?
10. Are salary hikes effective at retaining employees?
